

## Model DC-RAD3SLOT

Multi-Dosimeter Checker

MADE IN  
  
U. S. A.

### DC-RAD3SLOT

Multi-Dosimeter Checker

Allows for the simultaneous functional testing of up to three RAD-60 Electronic Dosimeters. The Multi-Dosimeter Checker consists of a plastic cylinder with three machined slots that surround an 8 uCi Cs137 Exempt Source. This device makes functional checking of RAD 60 Electronic Dosimeters easy!

Dosimeters are placed in the RAD-60 Dosimeter Checker and exposed for a period of time, when the alarm set points are reached the alarm will go off.

The exempt quantity sources that are supplied may be procured, handled, and used by persons who are exempt from U.S. Nuclear Regulatory Commission or Agreement State licensing requirements. The radioactive material contained in these sources should not be considered the principal hazard and is beyond the scope of the Material Safety Data Sheets (MSDS) requirements of 29 CFR 1910.1200(OSHA)

## Features:

- Radioactive Source: 8 uCi Cs-137 (Exempt)
- Cylinder Materials: Gray PVC
- Dimensions: 3.50" Diameter X 1.437" High
- Weight: .6 Lbs.
- Two-Year Warranty
