RDS-30 Radiation Survey Meter

The RDS-30 is a Digital Handheld Dose Rate Survey Meter designed for a wide range of applications involving a possibility for abnormal radiation levels.

RDS-30 is compact, light-weight, and waterproof. It's performance and friendly user interface make the RDS-30 perfectly suited to radiation survey in field conditions, in nuclear industry and for protection against radiological hazards by personnel, who may be exposed to gamma and or X-ray radiation. RDS-30 is microprocessor-controlled.

RDS-30 provides user configuration (with SW) list of sequential alarm levels for dose rate. The use of a CSW software is required for downloading the data into a PC via IrDA port.
